200 Series Maintenance Library User Guide

System Requirements

The minimum computer system configuration for running this CD:

Microsoft Windows 95/98/98 SE/ME/2000/XP/NT 4.0 with Service Pack 5, Intel Pentium processor (or equivalent), 64 MB RAM, 24MB of available hard-disk space and 4X CD-ROM Drive.

The recommended minimum computer system configuration for running this CD:

Windows 98/2000/ME/XP/NT 4.0 with Service Pack 3.0 or later, Intel Pentium (or equivalent) 400 Mhz processor or faster, 128 MB RAM, 24MB of available hard-disk space and 24X CD-ROM Drive.

Installation Instructions

Adobe Acrobat Reader 5.0 (or later) is required for using the Maintenance Library CD. If Acrobat Reader is not installed then select "Install Adobe Acrobat 5.05" on the open menu. Acrobat Reader can be installed using either CD 1 or CD 2.

If you have an earlier version of Acrobat Reader installed on your computer, you must uninstall the existing version and then restart your computer before installing version 5.05. You can also get the latest version and support for Adobe Acrobat Reader at Adobe's Website, www.adobe.com.

Note:

The Maintenance Library CDs are designed as 'Autoplay' CDs. They should execute automatically after being loaded into your computer's CD-ROM drive. If they don't, then autoplay may have been disabled on your computer. In that case, follow these steps to run the CD;

1. Click on the Start button in the lower left corner of your desktop.
2. Select Run.
3. Type 'X:\autorun.exe' (Replace X with the letter designation of your CD-ROM drive)
4. Click the OK button

HOW TO USE THE 200 SERIES MAINTENANCE LIBRARY – Part 1

There are 3 primary selection types on the opening title (blue) screen. To activate a selection, just put the mouse pointer on the desired selection and click the left mouse button.

1. Open the main menu - selecting this will open the main menu. If this doesn't happen, the likely cause is that Adobe Acrobat Reader is not currently installed on your computer. To confirm whether or not Adobe Acrobat is installed on your computer, click on 'Start', 'Programs', and look for Adobe Acrobat in your program list.

The main menu allows you to select a service manual or parts catalog for viewing. To return to the main menu, click on the "Main Menu" link located on the first page (menu/table of contents) of each manual or click on the lower of the 2 "X"s in the upper right hand corner of the window. Clicking on the upper "X" will close Adobe Acrobat and put you back the opening blue title screen.

2. Visit the MTG Website – This will connect you to our home page on the Internet (assuming you have an Internet connection). Our address on the web is www.mccurtainTG.com.

3. Install Adobe Acrobat 5.05 – This will install the Adobe Acrobat Reader software onto your computer.

To exit from the CD, click on the close button (X) in the upper right corner of the opening title screen.

To exit from the manual or our from Website, click on the close button (X) in the upper right corner of the window. This will return you to the opening title screen.

To exit from the Help Page, click on the close button (X) in the upper right corner of the window.

This will return you to the opening title screen.

HOW TO USE THE 200 SERIES MAINTENANCE LIBRARY – Part 2

Each CD contains its own main menu which contains links to all of the service manuals and/or parts catalogs on the CD. The first page in all of our manuals contains the menu for the manual. The different sections of the manual are listed in blue. The menu may contain 1, 2 or 3 addition links (in red boxes). Those links will display the *Toolbar Help* page, revision information (if applicable) or open/close bookmarks. All of our parts catalogs have the button to open & close the bookmarks.

Maneuvering through a manual

The menu lists all of the sections in the manual. Click on any section name to view the first page of that section. In the service manuals, the first page of each section contains the table of contents for that section. For example, in the Cessna 172 Service Manual 69-76, section 3 is Fuselage. The first page of the Fuselage section (page 3-1) contains

the table of contents and shows that Windshield information is on page 3-4. To get to page 3-4 we can click on the *Next Page* button (arrow pointing right) 3 times on the toolbar. Alternatively we could put our mouse pointer on the scroll bar on the right side of the window and pull it down until the page number shows 3-4. The scroll bar is best for moving through a large number of pages. For moving forward or backward just a few pages, the paging buttons work best. To return to the menu from any page, simply click on the first page button on the toolbar. The first page button is the button with the vertical line with the arrow pointing left.

To return to the main menu, you can: 1.click on the main menu button on the menu page or, 2.click the close document button (X) in the upper right corner of the document window, or 3.press CTRL and W together.

Additional Features of Parts Catalogs

Parts Catalogs typically contain hundreds of parts figures, which illustrate different sections of the aircraft. We have added functionality to help find the parts figure you're looking for.

In the parts catalogs, the first blue link (titled "List of Parts Figures" or "Links to Parts Figures") on main menu is a link to a list of all parts figures contained in the parts catalog. Click on the name of any parts figure and that figure will be displayed. The associated parts numbers are contained in the pages immediately follow the parts figure. The list of parts figures is also text searchable. For example, you can use the Find command to look for the word *aileron*. The Find command button looks like a pair of binoculars.

Adobe Acrobat Reader – General Preferences IMPORTANT!!

Our software products have been designed to work properly with specific settings in Adobe Acrobat Reader General Preferences. Below is information for confirming the proper settings in Acrobat Reader version 5.05. The settings shown below have been tested to give the best results on most systems:

To confirm your settings, open Adobe Acrobat Reader and on the upper command line, click on **View**, and then click on **Single Page**.

Then click on **EDIT**,
PREFERENCES,
DISPLAY

1. "Smooth Text" should be selected (checkmark).
2. "Smooth Images" should be selected (checkmark).

Then click on **EDIT**,
PREFERENCES,
OPTIONS

1. "Use Logical Page Numbers" should be selected (checkmark).
2. **"Open Cross-Doc Links in the Same Window" should NOT be selected (no checkmark).**

COPYING THE 200 SERIES LIBRARY 2-CD SET TO YOUR HARD DRIVE

The files on the 2 CDs can be copied to your computer hard drive for better performance and convenience.

The general procedure is as follows:

1. Create a new folder on your hard drive named "C200LIB".
2. Copy all files from both 200 Series CDs to the new folder. Note that some manuals/files are duplicated and exist on both CDs. Either version of those particular files can be used.
3. Create a shortcut on your desktop for the PDF file "menuC200". Note: If this file is not on your CDs, it can be downloaded from our website at <http://www.mccurtaintg.com/menuc200.pdf>. The PDF file "menuC200" must be contained in the folder "C200LIB".

Printing with Adobe Acrobat

When you use the print command, the print confirmation window will be displayed. We suggest the following setting for obtaining the best print results:

1. The option "**Print as image**" should be selected (check mark).
2. The option "**Shrink oversize pages to paper size**" should be off (no check mark) for printing 8.5 x 11 pages. (If page truncation occurs, turn this option back on)
3. The option "**Comments**" should be selected. Some of our products contain revision information made using the Comments tool. They will not appear on printed pages if the Comments option is turned off at print time.

Also note that when printing, the print confirmation screen offers several Print Range options: **All**, **Current page**, or **Pages from: __ to: __**. The default is **All** so be sure to specify the correct option at print time.
